Hurricane Irene and TS Lee featured in new StormStock collection

ARLINGTON, Texas – Prairie Pictures announced today that it has added a new batch of footage and stills to StormStock including shots of Hurricane Irene and Tropical Storm Lee. The material features storm surge and flooding in New York and damaging winds raking through the Bahamas.

Other new material includes flooding in the Adirondack Mountains, blizzards and rain storms in New York City, volcanoes from Indonesia, baseball-size hail impelled into the ground, dramatic stormy sky plates, and a violent tornado (complete with flying trees) tearing through Oklahoma.

The new images are currently available for viewing and licensing, and will soon be offered at the StormStock web site (www.stormstock.com) as downloadable full-resolution files.
